

# ANSWER YOUR DOOR ANYWHERE.

WITH DOORBIRD YOU  
NEVER MISS A VISITOR.

[www.doorbird.com](http://www.doorbird.com)

## SMART HOME STARTS AT THE FRONT DOOR

DoorBird is the smart solution for your house entrance. Simply connect your DoorBird IP Video Door Station to your smartphone and talk to your visitor – anywhere you are. The IP Video Door Station can be used as a stand-alone unit or can be integrated into an existing Smart Home platform. Even existing classic installations such as an electric door opener can still be used and controlled via the DoorBird App.

## QUALITY MADE IN GERMANY

All DoorBird products are designed, developed and produced by Bird Home Automation GmbH in Berlin, Germany. We manufacture all products with the greatest care and precision, and deliver them to our customers all over the world.

More than 120 employees are committed to continuously developing DoorBird in order to guarantee the highest quality, longevity and customer satisfaction. For us "Made in Germany" is not only a seal of quality, but a philosophy.

Imagine, you are not at home and your children have locked themselves out or the courier wants to deliver a parcel. With DoorBird this is no longer a problem. Every time someone rings the doorbell you will get a push notification on your smartphone or tablet. Via the DoorBird App you are not only able to talk to the visitor but also see them live in HD quality. You will never miss a visitor again. With DoorBird you are on the move and yet at home, even if a burglar rings at the door to check if someone is at home.

## FEATURES

**Video and audio call**

- On smartphones, tablets (iOS, Android), IP and landline phones (SIP)

**Smart Transmission Mode (STM)**

- Real-time audio / video communication, optimized for mobile devices via WiFi, 3G, 4G, 5G

**Open API**

- Local interface for integration with third-party systems and SIP

**Automatic door buzzer**

- For use in medical offices and office environments

**Smart Home & NVR compatible**

- Control4, Loxone, Crestron, Synology, AVM FRITZ!Fon, URC, QNAP, RTI, ELAN, Fibaro, Bang & Olufsen and others

**Free visitor history**

- Store still images for free, optional video recording available

**Geofencing**

- Automatic door and gate opening when returning home

# A SOLUTION FOR EVERY NEED

From compact entry-level models through classic call button door stations to universal keypad models, our product variety leaves nothing to be desired. With DoorBird you get the perfect solution for single-family homes as well as for large residential buildings, apartment complexes and commercial spaces.

## CUSTOM SOLUTIONS

Unique properties and installation environments often require individual solutions. DoorBird can manufacture truly unique intercom systems according to your specific requirements. We combine high-quality mailbox and doorbell systems from well-known manufacturers with DoorBird IP video technology. Through the wall or fence-mounted mailbox systems, communication columns or bell panels – each IP system is customized to your needs and individually manufactured.\*

\* Only available in selected countries. Contact us for more Information.

## ACCESSIBILITY MODULE

Our IP video door station can be expanded using our 3D Configurator to include the "Accessibility Module" for people with impaired hearing. The module was developed for use in public buildings, kindergartens, educational institutions, hospitals, public transport and retirement homes. It complies with DIN 18040 for barrier-free constructions. In France, the integration of the module is an integral part of the building regulations. With this module, the door station is expanded to include a status display and a hearing loop.

The status display with three pictograms (calling, speaking, door opening) assists communication for people with hearing impairment by visualizing the current status of the door station. The hearing loop or the induction loop is used for wireless sound transmission from the door station to the hearing aid. Using this function, you can meet the required norms, and also make communication, for example, with reception, significantly easier for everyone wearing a hearing aid. The hearing loop developed by DoorBird has an internal antenna, so that the design of the door station remains fully retained.

The door station can be supplemented with Braille on request so that visually impaired or blind people can feel the texts and use the door station intuitively.

## A1101 IP VIDEO INDOOR STATION

The DoorBird IP Video Indoor Station is an ideal addition to any DoorBird system. When paired with our DoorBird IP Video Door Intercom, the Indoor Station delivers a live video stream, two-way audio communication as well as control of doors and gates. The Indoor Station is compact and designed to complement any environment.

The DoorBird Indoor Station has a touch display made of scratch-resistant tempered Gorilla® glass with intuitive user interface. It also includes configurable hard buttons with clear symbols for common functions.

This makes the operation

- intuitive and comfortable
- easy-to-use for every age group
- even with gloves on possible

Individual chime alerts can be selected for multiple DoorBird Door Intercoms to indicate from which entry the visitor is calling. When the DoorBird Door Intercom is rung, an LED light at the bottom of the Indoor Station flashes a visual alert. The color of the LED light can be customized for multiple DoorBird Door Intercoms.

Configurable tile view

Weather information

Table Stand "A8003" optional

## FEATURES

### Benefits via IP

- Door opener and elevator control
- Visitor history (free Cloud Recording)
- Room to room communication, when using several Indoor Stations
- SIP support, e.g. for concierge or facility manager calls
- Weather forecast display
- Home and building automation control (IP, TCP, HTTPS, relays etc.)
- Configurable via the DoorBird App worldwide

### Intuitive User Interface

- 4" True Color Touch Display
- Scratch-resistant tempered Gorilla® glass

### Two-way Audio Communication

- HD Audio, up to 102 dB
- More than 50 doorbell sounds available

### Compact Housing

- 5 hardware buttons for main functions
- Configurable RGB LED status bar

### Unlimited Range

- Supports WiFi, Ethernet, PoE
- Support for multiple DoorBird IP Video Door Stations

### Further Options

- Automatic door opening system, e.g. for offices

In less than 10 minutes the installation of the Indoor Station is completed. The DoorBird Indoor Station can connect to the network via WiFi or a network cable. If the Indoor Station is connected using a network cable, it can be powered via Power over Ethernet (PoE) for quick and easy installation. Should the Internet fail, all functions continue to operate within the local network. Once on the Internet, the Indoor Station can connect you to all your DoorBird Door Intercoms - anywhere in the world.

If more than one Indoor Station is used, room to room communication between all Indoor Stations is supported. A SIP phone can also be called at the touch of a button, e.g. to contact a concierge or property manager. Calls from a SIP phone to the Indoor Station and Door Station are also possible.

A1061W

## IP DOOR CHIME A1061W

### Features

- Front door and storey-call option
- WiFi, Ethernet, PoE
- Configurable via App worldwide
- Do not disturb mode available
- Works online or on local network
- Multiple ringtones available (50+)
- Unlimited range, works anywhere
- Easy to hear, discreet design
- Made in Germany

## RETROFITTING

A1091

## GIGABIT POE INJECTOR A1091

### Features

- Gigabit transmission speed
- Automatic determination of the required power supply
- Plug and play, no configuration required
- Simple and fast installation
- High-quality metal enclosure, suitable for mounting on walls, ceilings or in control cabinets

A1071

## 2-WIRE ETHERNET POE CONVERTER A1071

Transfer network data (Ethernet) and power (PoE) with a simple two-wire cable over long distances.

### Features

- Use of existing cabling
- Only a two-wire cable required for both data transmission and power supply (PoE)
- Compact design, robust housing
- Easy and fast installation
- Suitable for mounting on walls, ceilings and in control cabinets

UPDATE AND EXPAND

A1081

## IP I/O DOOR CONTROLLER A1081

### Features

- Tamper-proof control of up to three doors or gates
- Encryption according to banking standards
- Monitoring of two external sensors
- Three freely configurable bi-stable switching relays (for continued or scheduled toggle between open and closed)
- The latching relays keep their state even in the case of power outage
- Wireless network, Ethernet, PoE
- Alarm notification via push notification on smartphone and tablet
- Suitable for mounting on walls, ceilings and in control cabinets

## A8005 DUAL-FREQUENCY RFID TRANSPONDER KEY FOB

125 KHz (EM4100) and 13.56 MHz (MIFARE® DESFire® EV2 8K), for D21x and later

A8003

## TABLE STAND A8003

For DoorBird IP Video Indoor Station A1101 with anti-slip pad for optimal surface adhesion

A8001

## WEDGE CORNER WALL-MOUNT ADAPTER A8001

For D1101V Surface-mount, 7,5°, mounted vertically down or up

A8002

## ANGLE CORNER WALL-MOUNT ADAPTER A8002

For D1101V Surface-mount, 45°, mounted left or right

## BIRDGUARD B101

The BirdGuard is the ideal addition to your DoorBird. See what happens after the visitor entered your house.

## COMBI HORN SPEAKER/SIREN A001

Combi horn speaker/siren A001 for BirdGuard (incl. amplifier within the BirdGuard), 100dB

# REFERENCES AND INTEGRATIONS

DoorBird fits perfectly into any environment. With our "Made in Germany" products we inspire customers all over the globe. More than 100.000 IP Video Door Stations have already been installed worldwide.

Via our open interface "DoorBird Connect", DoorBird can be integrated into third-party home and building automation systems. Connect your DoorBird to your favorite components, such as traditional door openers, classical door chimes, smart locks, home servers, Hubs, NAS and NVR. This ensures the full control over your Smart Home and the Internet of Things (IoT), and you will benefit from the additional comfort and increased security.
